

## **APPENDIX C**

### **2006 STRUCTURAL ENGINEER SEISMIC EXAMINATION REFERENCE LIST**

The following references are required for the 2006 California Structural Engineer Seismic Examination:

- 2001 California Building Code with all supplements
- AISC Manual of Steel Construction, Allowable Stress Design (ASD) 9<sup>th</sup> Edition
- AISC Manual of Steel Construction, Load and Resistance Factor Design (LRFD), Second Edition, Volumes 1 & 2 (use only when specified)
- 1991 or 1997 National Design Specification (NDS) for Wood Construction
- Seismic Provisions for Structural Steel Buildings, April 15, 1997, Including Supplement No. 1 (February 15, 1999) and Supplement No. 2 (November 20, 2000), published by American Institute of Steel Construction (AISC). *(Available through website <http://www/aisc.org> and search for 1997 Seismic Provisions)*
